

ProBreeder Kennel Panels and Gated Panels

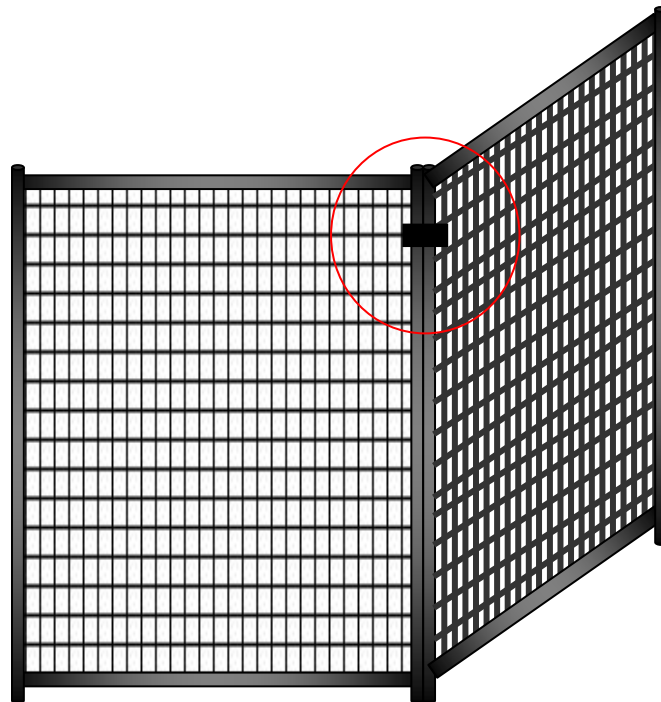

Assembly instructions

Step 1:

Determine where you are going to place the kennel. Be sure to leave room for you to open and close the kennel gate(s).

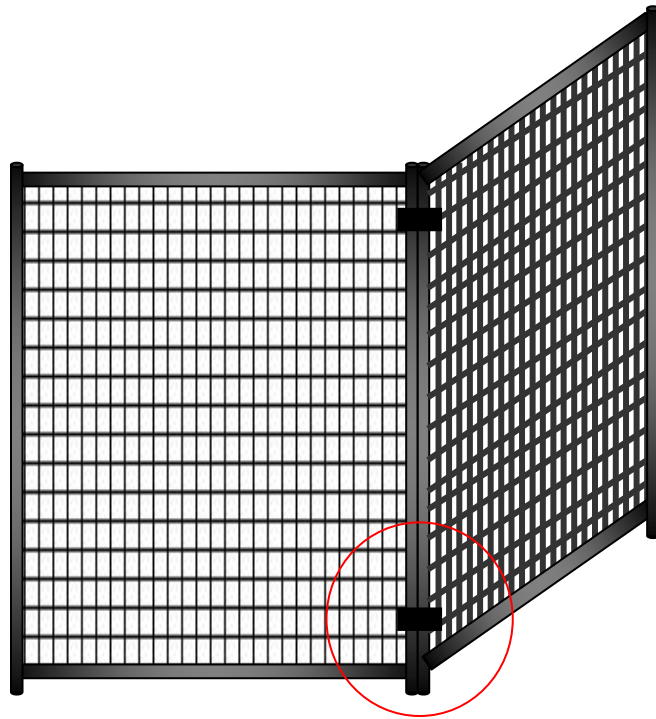

Step 2:

Stand up two panels next to one another, and attach a clamp towards the top of the joined panels to keep them stable.

Step 3:

Once the top clamp has been secured, fasten a clamp towards the bottom of the panels.

Step 4:

Continue placing all panels and kennel clamps until all sides are assembled. Your kennel is complete!
